

DOCUMENTATION OF 'MADE IN CHINA'

MADE IN CHINA

CONCEPT ART BY

ABISHEK S VAIDHYA

'MADE IN CHINA' is a concept art, that actually defines that the character in the art is bounded to use the gaming equipment and was written in Chinese. But the character is not from China. The brand name indicates a famous brand Asus which actually pronounced as Huáshuò in traditional Chinese. The concept is based on the fact that one of the most selling gaming accessories is of the brand Asus. And the concept is that in future the world will be bound to use the products that are made in China. So, there will be no way that in the future that the character can actually expect a product to be made in her nation.

It's just a concept, that is expected to be taken as a creativity factor. And to be considered as a disclaimer as well.

THANK YOU.
